

BRAINSTORMING AND IDEATION

1. Project Idea

PocketSmart AI is a smart budget management and recommendation assistant designed to help users manage their monthly budget and expenses easily. It provides a simple way to enter the monthly budget and total expenses and calculates the remaining balance.

2. Problem Identified

Many users find it difficult to keep track of their monthly expenses and understand whether they are spending within their budget. Manual calculation can also lead to mistakes.

3. Proposed Solution

PocketSmart AI provides a simple budget management solution. The user enters the monthly budget and total expenses. The system calculates the remaining balance and provides a basic recommendation based on the result.

4. Main Features

- Enter monthly budget
- Enter total expenses
- Calculate remaining balance
- Display budget summary
- Provide basic spending recommendation
- Simple and user-friendly interface

5. Target Users

The system can be useful for students, individuals and families who want to monitor their monthly budget and expenses.
